

CONNECTICUT DEEP NATURAL DIVERSITY DATABASE

Presented by: **Robin Blum, Supervisor**
Natural Diversity Database Program

What Is the Natural Diversity Database Program?

Our Mission Statement

A program for the protection of native wildlife and plant species that are in danger of becoming extinct, and important ecological communities.

- Using data collection, research and data analysis to determine which species need protection as endangered, threatened or special concern under the state endangered species act.
- To compile, analyze, and publish information about at-risk species in order to support and promote understanding and action.
- To house a repository of information, including data, reports and published materials regarding rare and at risk species and their habitats in Connecticut.
- To work with federal, state, local and private stakeholders to conserve, protect, restore and enhance state listed species populations and their essential habitat.

What We Do

- Data Repository – Compile and Distribute Data for research and conservation
- Maintain and update Connecticut's Endangered, Threatened and Special Concern Species Lists
- Partner with other Agency Programs and Divisions
- Participate in Regional Conservation Efforts
- Environmental Review

Our Partners Include:

- Academic Researchers
- Scientists
- Conservation Organizations
- Land Trusts

A lot of environmental reviews!

CT General Statute 26-310:

Sec. 26-310. Actions by state agencies which affect endangered or threatened species or species of special concern or essential habitats of such species.

(a) Each state agency, in consultation with the commissioner, shall conserve endangered and threatened species and their essential habitats, and shall ensure that any action authorized, funded or performed by such agency does not threaten the continued existence of any endangered or threatened species or result in the destruction or adverse modification of habitat designated as essential to such species, unless such agency has been granted an exemption as provided in subsection (c) of this section. In fulfilling the requirements of this section, each agency shall use the best scientific data available.

Statutory triggers:

State Authorization – projects requiring any state permit or authorization (DEEP permits)

State Agency Funding – projects involving state grant funding (DECD, etc)

State Agency Action – DOT work, DEEP projects

Others:

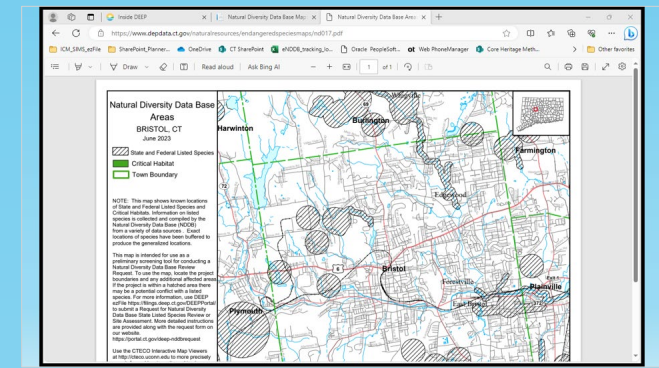

Municipalities – some may require consultation with the NDDDB program to help inform the local approval process.

Concerned Citizens also submit requests for listed species information.

Land Trusts and other conservation partners may inquire about listed species on properties they own, manage, or are assessing for potential acquisition.

Old Process

1. Pre-screening – is the location of interest in an NDDDB area?
2. If yes, then fill out and submit (email) NDDDB review request form with maps and supporting document.
3. Biologist reviews the submitted material, follows up with any questions, and prepares response.
4. Response types:
 - Final Determination – includes BMPs as necessary, can be used to show compliance with ESA
 - Preliminary Assessment – further info needed before Final Determination can be issued.

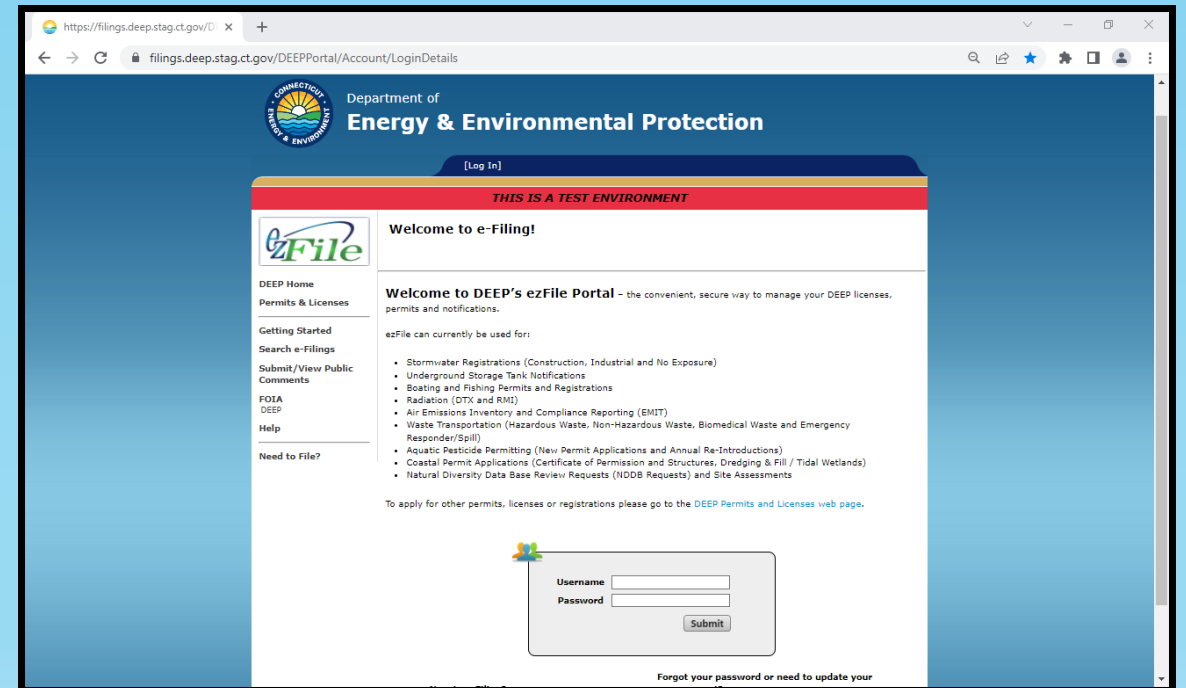

New Process

NDDDB Requests now submitted through DEEP online ezFile Portal!

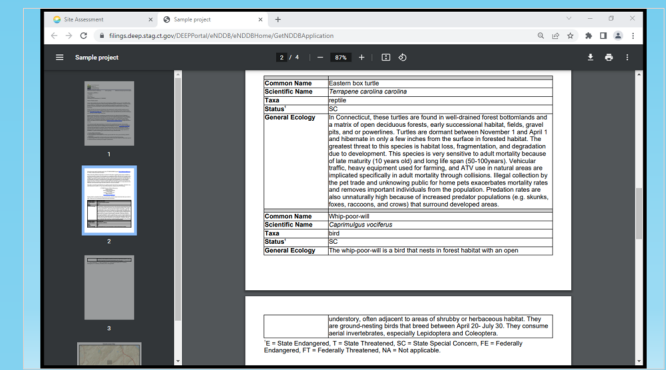

Two options:

- Site Assessment
- New NDDDB Determination

Site Assessment:

- Snapshot of species that may be in the vicinity of an area.
- List is computer generated and not reviewed by NDDDB staff.
- Sensitive species not identified
- Uses – planning tool, understanding of potential for listed species to use the site
- Limitations – may not be a comprehensive list; biologist review may result in additions.

New NDDB Determination:

ezFile Portal – provide information according to the prompts

Two Response types:

- Auto/e-generated – available immediately
- Biologist Review – request is routed to a biologist for further review

So, how do you get started?

Need to File?

Welcome to DEEP's ezFile Portal - the convenient, secure way to manage your DEEP licenses, permits and notifications.

ezFile can currently be used for:

- Stormwater Registrations (Construction, Industrial and No Exposure)
- Underground Storage Tank Notifications
- Boating and Fishing Permits and Registrations
- Radiation (DTX and RMI)
- Air Emissions Inventory and Compliance Reporting (EMIT)
- Waste Transportation (Hazardous Waste, Non-Hazardous Waste, Biomedical Waste and Emergency Responder/Spill)
- Aquatic Pesticide Permitting (New Permit Applications and Annual Re-Introductions)
- Coastal Permit Applications (Certificate of Permission and Structures, Dredging & Fill / Tidal Wetlands)
- Natural Diversity Data Base Review Requests (NDDB Requests) and Site Assessments

To apply for other permits, licenses or registrations please go to the [DEEP Permits and Licenses web page](#).

New NDDB Determination

The screenshot shows the DEEP eFiling System dashboard. At the top, a navigation bar includes the user name 'Robin Blum', a 'Log Out' link, and notifications for '0 Unpaid Filings' and '12 Unread Messages'. A prominent red banner reads 'THIS IS A TEST ENVIRONMENT'. The main content area is titled 'eFiling System' and 'My Home/Filings'. A 'Welcome to your home page' message is followed by instructions to select an open filing or start a new one. A 'Filter' modal is open, displaying a list of filing types: 'Underground Storage Tank', 'Stormwater', 'Boating & Fishing', 'Radiation', and 'NDDB'. Under 'NDDB', two options are listed: 'Start new NDDB filing' and 'Start Site Assessment', both of which are circled in red. Below the modal, a 'Finalized Filings' table is visible, showing a list of completed filings with columns for Type, ID, Permit ID, Start Date, End Date, Status, and Info.

Submit

Do you agree to the following terms? Please note: if you do not agree, you will not be able to submit.

CERTIFIER AGREEMENT:

I understand and agree that it is my responsibility:

- To protect my account and electronic signature from compromise, not allow any other person, entity or organization to use my account or electronic signature;
- To change my electronic signature if there is reason to believe they have or will become known to any other person entity or organization;
- To promptly report to Connecticut DEEP any evidence of the loss, theft, or other compromise of my account or electronic signature within one business day of becoming aware of such occurrence;
- To notify Connecticut DEEP, in writing, if there is any change in my role or status that affects my authorization to submit electronic records using my account and electronic signature on behalf of any
